Introduction

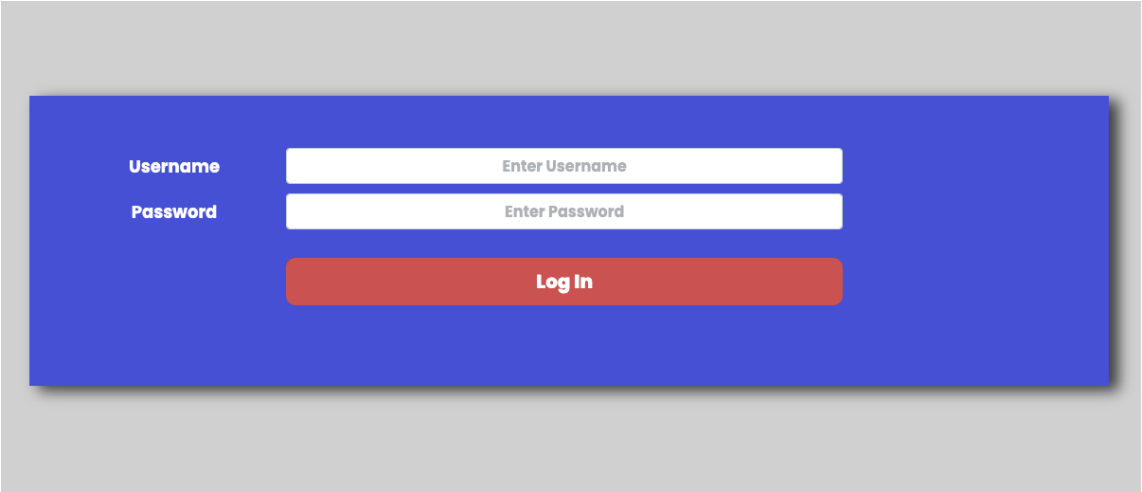
The purpose of this manual is to allow the user to login into the database and be able to set a date, time, and the amount of people the customer is bringing. The user will also be allowed to see the tables that are available to be reserved.

Instruction

First you need to be able to access the website through the specific link that is down below:

- https://t5-booking-app.netlify.app/

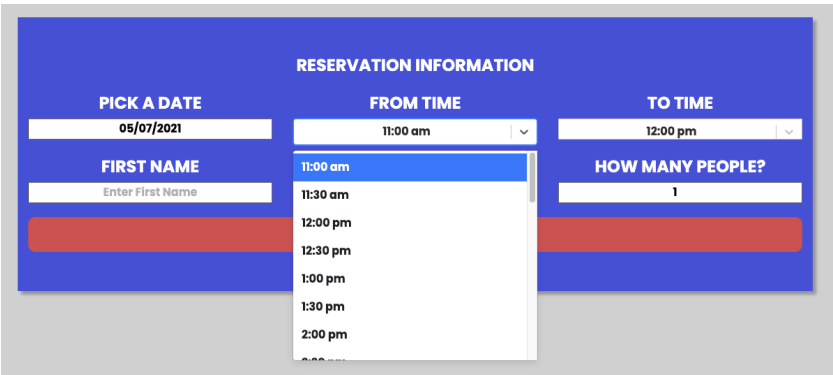
By accessing the link provided above it will take you to the login screen as shown below. You would need to have an account in order to access the system.



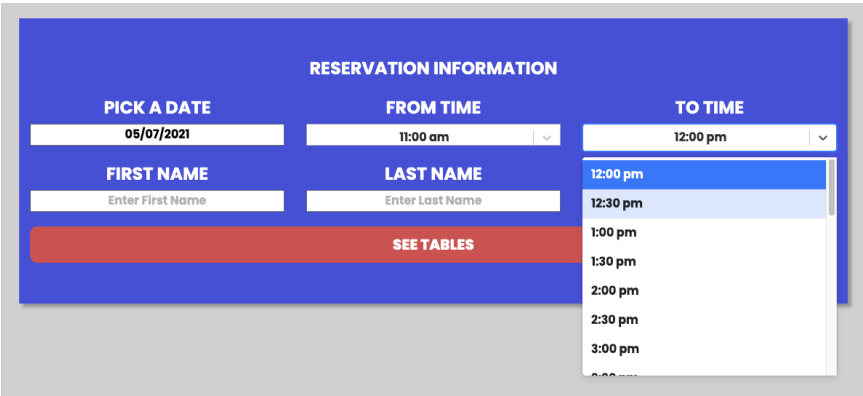
Once you have login with your account it will take you to the reservation information that is shown below. This page is where the user can set a specific date, start time, end time, and the amount of people that is coming.

To be able to select a certain date to reserve, you click on the bar below the “PICK A DATE”. This will then display a drop down with a calendar showing the available day.

To be able to select a certain time to reserve, you click on the bar below the “FROM TIME”. This will then display a drop down scroll bar with the available times that can be reserved on that certain day. NOTE* When you see the time are grey, that mean they have been taken or cant be reserve at that time*

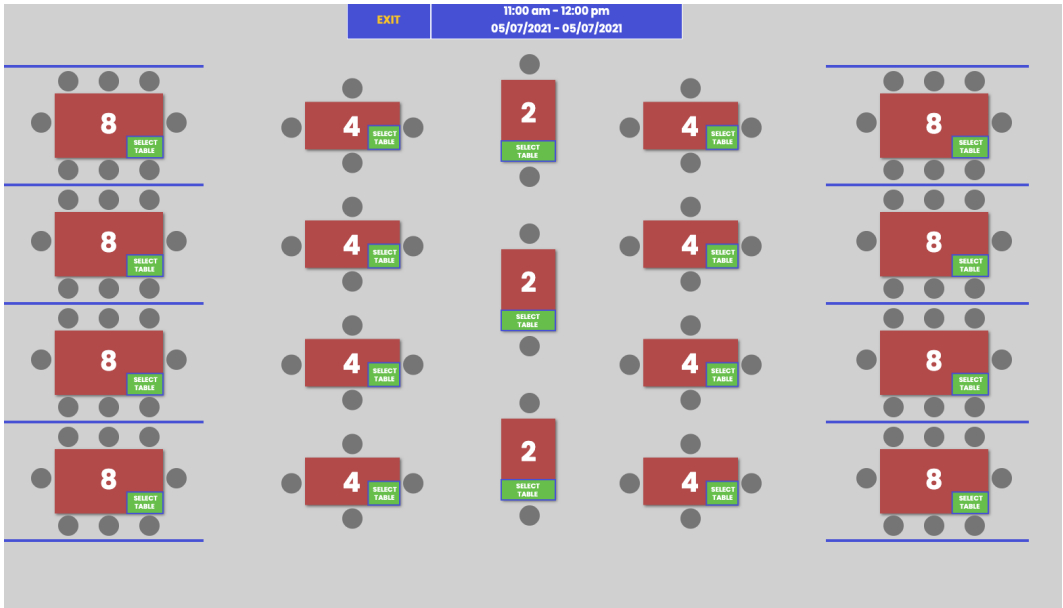


To be able to select a certain time to reserve, you click on the bar below the “To TIME”. This will then display a drop down scroll bar with the available times that will end your reserve time. NOTE* When you see the time are grey, that mean they have been taken or can't be reserve at that time*



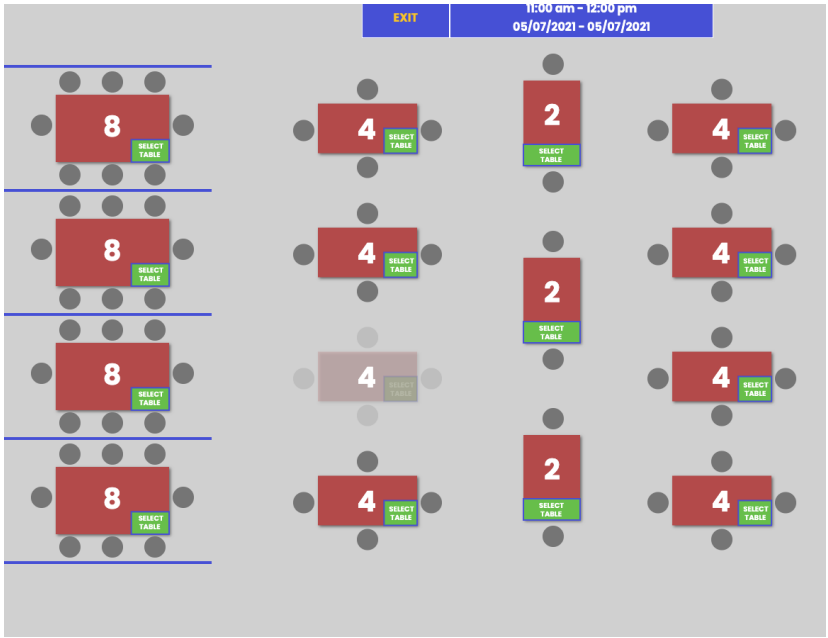
To be able to select the amount of people that are coming, you click on the up or down arrow located at the right sidebar below the “HOW MANY PEOPLE?”. This will then display the number of people that the customer is bringing for the table. AFter filling in all of the information you would then click on the see table button. NOTE*The max people to a reserve table is 8*

After clicking on the “See Table” button, it will then take you to the table that is shown below. This is the page where the user can choose what table they want to be seated in.



After you have chosen the table that the user wants to reserve, it will then pop up a confirmation. What this confirmation pop up is for displaying the information of when the reserve is being set and the end time of the reservation. Also it will show the name that the reserve table will be under. NOTE *Whenever the user selects the table that has the incorrect amount of reserved seats the user inputted for the amount of people they are bringing, it will not be confirmed and will refresh the table page until the user selects the correct sufficient number of people that the user is bringing.

After selecting the correct table to reserve the amount of people the user is bringing, the table will be highlighted indicating that the table has been reserved and will not be able to be reserved until the time of the reserve table has ended.



Whenever you have finished selecting and confirming the user reserve table, you would then click the button that says “Exit”. This will then lead you back into the “RESERVATION INFORMATION” page where the user could input in another person who wants to set a reservation.
